PROFILE

I have over 30 years of experience writing quality software. I have accumulated expertise in all aspects of software engineering to create and maintain world-class software. Most importantly, it is what I love to do.

EXPERIENCE

Chief Technical Officer, Avatron Software Inc 2008-2013

As chief technical officer for Avatron Software, my role is mainly as a primary code contributor as well as mentor and architectural sounding board. I have worked on all of Avatron's iOS projects as well as significant portions of the OS X and Windows versions of some of our applications. The main products are the Air Sharing, Air Display and Air Login family of products, as well as other smaller applications.

Senior Software Engineer, Apple Inc 2005-2008

Upon my return to Apple, I started work right away on the design and implementation of iWeb 1.0. I was involved in all aspects of the design and coding since we were a very small team. The product was taken from concept to shipping in nine months. After November 2007, I worked on another major application within the Applications division, which never saw the light of day (but was pretty cool).

Technical Lead, Extensis, Inc 2004-2005

Technical lead for Font Reserve, which is a cross platform client/server font management application. The applications that make up the product are a combination of pieces written in C++ & Objective-C, using Visual Studio, CodeWarrior and Xcode. I was in charge of managing resources as well as planning schedule and features using the Agile methodology, as well being a significant engineering contributor.

Software Development Consultant, Woolsoft 2004-2004

Contracting work for Intuit working on QuickBooks 7 for Mac as a senior software engineer. The contract was in two phases and I was there for a total of five months.

Senior Software Engineer, Claris Corporation/Apple Inc 1996-2004

Major contributor to all major and minor releases of ClarisWorks 5 & AppleWorks 6 for MacOS Classic, MacOS X and Windows. It won awards from all sections of the industry, both in the Macintosh and Windows world. I also designed the Charting module of Apple's Keynote.

Managing Director Of Technology, MotionWorks Group Limited 1994-1996

Vice-president of a multi-media company that created content creation tools as well as multi-media titles. My responsibilities included product design & implementation. I also guided all team members in designing and coding products for the company, as well as set company policy and direction

Senior Software Engineer, Chancery Software Ltd. 1993-1994

Co-designed, implemented and released a three-tier client server student information system. I was involved in the server, middle-ware, as well as the client software. This system involved OS-400 & OpenVMS as servers, Novell NetWare as middle-ware, and Macintosh & Windows as clients.

Software Engineer, FAMUS Research Project 1991-1993

Responsible for designing and implementing a communication system linking 200 doctors computers and a central database system. This system included data transfer, client software updates and remote debugging capabilities.

Software Engineer, Le Groupe Teknika 1987-1991

Responsible for implementing a land surveying system, as well as designing and implementing software for use inside and for sale outside of the company.

Software Engineer, Logiciel Visiontronique 1985-1987

Designed and implemented a database management application for consumer use on the Commodore-64. This was released as CardTex-64. This was my first experience with writing commercial software.

Software Engineer, Woolsoft 1981-

This is my contracting & shareware software company. I've been writing software under contract and for entertainment, as well as shareware and freeware applications since first learning to program. It is something that I love to do and that I find keeps me fresh and motivated.

EDUCATION

Champlain Regional College Certificate in Data Processing, 1982-1990
